

# Ecrire avec la reconnaissance vocale de Windows 10 ou 11

1: Ouvrir

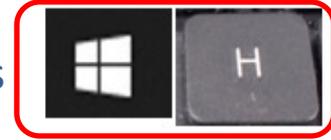

OU

OpenOffice Writer

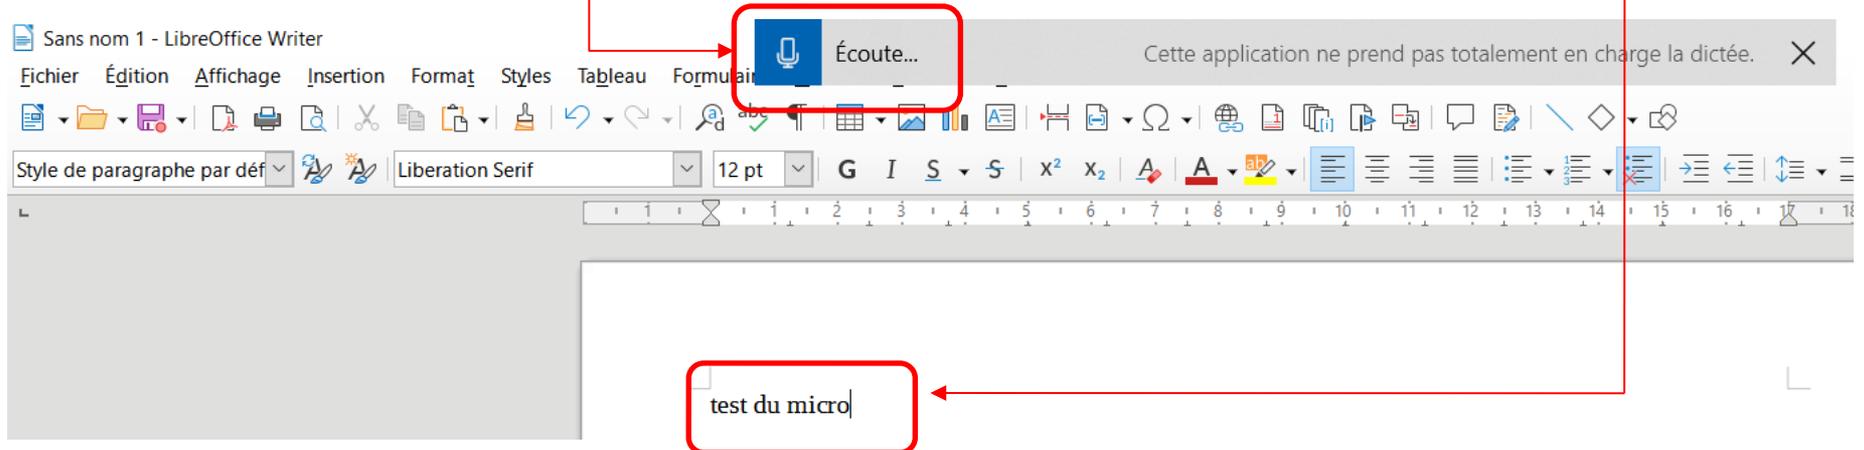

# Ecrire avec la reconnaissance vocale de Windows 10 ou 11

2: Une fois que « Writer » est ouvert : Appuyer simultanément sur les touches

3: Le micro apparaît en haut, vous pouvez parler et automatiquement la voix sera retranscrite dans le document.

A screenshot of the LibreOffice Writer application window. The title bar reads "Sans nom 1 - LibreOffice Writer". The menu bar includes "Fichier", "Édition", "Affichage", "Insertion", "Format", "Styles", "Tableau", and "Formulaires". The toolbar contains various icons for file operations and editing. The status bar at the bottom shows "Style de paragraphe par déf", "Liberation Serif", "12 pt", and text formatting options (G, I, S, S, x², x₂, A, A, ab). A red-bordered box highlights a microphone icon with the text "Écoute..." next to it. A red arrow points from this box to the text "test du micro" in the document's text area. Another red-bordered box highlights the text "test du micro" in the document area, with a red arrow pointing from the text in step 3 to it. A grey notification bar at the top right says "Cette application ne prend pas totalement en charge la dictée." with a close button.
